📱 (48) 98403-7518

2002 — Finishing first Bachelor's degree and leaving graphic work to work as a Web Designer.

2013 — Finishing my second Bachelor's degree and becoming a Senior Web Designer with lots of experience in UX/UI.

2016 — The beginning of the change to Front-end Developer. Combining UX/UI with Interface Development as a "re-junior" Dev :)

2018 — Finishing my Postgraduate Degree in Interaction Design (UX/UI), complementing my profile to deal with the entire Front-end cycle. This moment is also marked by the beginning of 100% remote work.

2023 — Continuing the process of growth as a professional, I started in 2023 in the mobile development segment with React Native working with the development of mobile components.

Educação

- Estácio de Sá(UNESA) University - Rio de Janeiro - 2002 - System Analisys.
